

Opti 380A – Intermediate Optics Lab I – Fall 2009

Post-Lab Questions for Lab 13: Gratings

These post-lab questions are due by the last day of class, December 9, by 4pm. Please turn in your answer to Juliet Hughes in room 642.

- 1.) (30pts) In labs 1-13, you have analyzed several methods to measure wavelength of a laser beam. Pick one method and describe it completely. You will need to consider what happens when the laser beam contains multiple wavelengths.
