

Instructions for Installing Zemax

First, download and install the Sentinel Key Driver.

Second, download and install the latest version of Zemax Update.

Both of these downloads can be found at:

<http://www.zemax.com/updates/index.html>

Rename the attached file to an .xml file type. Place the renamed file in the same folder as the Zemax.exe program (Usually C:\Program Files\Zemax)

NOTES:

Do not call Zemax Development Corporation for any issues related to the use or acquisition of this academic license of Zemax. This academic license does not include technical support. Please direct any question to your instructor or teaching assistant at the University of Arizona.

The ZEMAX Optical Design Program has been made available by Zemax Development Corporation for the College of Optical Sciences students enrolled in optical design courses or engaged in optical design research. This program is available for academic purposes only under the license agreement with the program supplier. Any use outside of that required for course and academic research purposes will require specific approval from the program supplier. The student is required to honor this agreement. *Use for private or consulting purposes is expressly forbidden.*

Students are reminded that this program is under various types of legal protection. Any attempt to copy or duplicate any program material may constitute a prosecutable offense.
