

Job Title: Optical Testing Engineer (SNC23Q3001)

Job Type: Full time

Location: Zhejiang, China

Company Overview:

Established in 1984, Sunny Optical Technology (Group) Co., Ltd. stands as a world-leading manufacturer of integrated optical components and products. In 2007, the company achieved a significant milestone by becoming the first domestic optical enterprise to be listed on the main board of the Hong Kong Stock Exchange. Over the past 30 years, the company has experienced remarkable growth, expanding more than 10 times every decade. Now, Sunny has established stable, close, and long-term strategic partnerships with globally renowned customers in related industries. Notably, the company holds the top global market share in automotive lenses, camera modules, and mobile phone camera lenses.

We are actively searching for a highly skilled and motivated Optical Testing Engineer to become a valuable member of our team and contribute to our unwavering commitment to excellence and innovation in the field of technology.

Responsibilities:

1. Develop and establish lens evaluation standards and oversee the evaluation of lenses and optical components.
2. Play a key role in defect analysis for lenses and product performance, collaborating with suppliers to enhance component quality.
3. Provide valuable assistance and technical support to customers in resolving pertinent issues, ensuring that products meet the client's satisfaction.

Qualifications:

1. Master's degree in Optical Engineering, Optoelectronics, and related fields.
2. Achieved a top 30% ranking in the major at school.
3. Proficient in optical principles related to lens imaging, photoelectric imaging sensors, and the manufacturing principles of optical components.
4. Competent in utilizing at least one optical design software, such as ZEMAX, Light Tools, etc.
5. Experienced in optical testing with proficiency in two or more testing instruments or methods.
6. Enthusiastic about optical design and testing, resilient, and possessing strong communication and expression skills.

Job Title: Process Engineer (SNC23Q3002)

Job Type: Full time

Location: Zhejiang, China

Company Overview:

Established in 1984, Sunny Optical Technology (Group) Co., Ltd. stands as a world-leading manufacturer of integrated optical components and products. In 2007, the company achieved a significant milestone by becoming the first domestic optical enterprise to be listed on the main board of the Hong Kong Stock Exchange. Over the past 30 years, the company has experienced remarkable growth, expanding more than 10 times every decade. Now, Sunny has established stable, close, and long-term strategic partnerships with globally renowned customers in related industries. Notably, the company holds the top global market share in automotive lenses, camera modules, and mobile phone camera lenses.

We are actively searching for a highly skilled and motivated Process Engineer to become a valuable member of our team and contribute to our unwavering commitment to excellence and innovation in the field of technology.

Responsibilities:

1. Engage in the evaluation of product designs and process production plans.
2. Contribute to the validation of relevant parameters.
3. Collaborate on the development of process validation plans and create detailed validation plans.
4. Assist in crafting and refining process documents, including flow charts, work instructions, PFMEA, and more.
5. Recommend pertinent requirements and propose solution suggestions for tooling and fixtures based on actual usage needs.

Qualifications:

1. Bachelor's degree or higher, with majors in computer science, electronics, communication, or related fields.
2. Possess strong logical thinking and a proactive approach to work.

Job Title: Quality Engineer (SNC23Q3003)

Job Type: Full time

Location: Zhejiang, China

Company Overview:

Established in 1984, Sunny Optical Technology (Group) Co., Ltd. stands as a world-leading manufacturer of integrated optical components and products. In 2007, the company achieved a significant milestone by becoming the first domestic optical enterprise to be listed on the main board of the Hong Kong Stock Exchange. Notably, the company holds the top global market share in automotive lenses, camera modules, and mobile phone camera lenses.

We are actively searching for a highly skilled and motivated Quality Engineer to become a valuable member of our team and contribute to our unwavering commitment to excellence and innovation in the field of technology.

Responsibilities:

1. Engage in the complete quality control process for new projects.
2. Take charge of rectifying and preventing non-conforming products within the internal product production process and assess the efficacy of improvements.
3. Lead internal audits and annual customer audits prior to the commencement of mass production for products.
4. Contribute to process parameter setting and validation before mass production and engage in process parameter validation and quality enhancement for mass-produced items.

Qualifications:

1. Bachelor's degree or higher with majors in computer science, electronics, communication, or related fields.
2. Demonstrate strong logical thinking and a proactive work approach.

Job Title: Project Manager (SNC23Q3004)

Job Type: Full time

Location: Zhejiang, China

Company Overview:

Established in 1984, Sunny Optical Technology (Group) Co., Ltd. stands as a world-leading manufacturer of integrated optical components and products. In 2007, the company achieved a significant milestone by becoming the first domestic optical enterprise to be listed on the main board of the Hong Kong Stock Exchange. Over the past 30 years, the company has experienced remarkable growth, expanding more than 10 times every decade. Now, Sunny has established stable, close, and long-term strategic partnerships with globally renowned customers in related industries. Notably, the company holds the top global market share in automotive lenses, camera modules, and mobile phone camera lenses.

We are actively searching for a highly skilled and motivated Project Manager to become a valuable member of our team and contribute to our unwavering commitment to excellence and innovation in the field of technology.

Responsibilities:

1. Successfully manage the entire project lifecycle of the car-mounted camera product, from project initiation to completion, ensuring the attainment of project milestones in progress, quality, cost, technology, and other objectives.
2. Collaborate with the project manager in overseeing project outcomes and evaluating the performance of project team members.
3. Facilitate the resolution of issues and challenges encountered during project advancement.
4. Capable of executing ad-hoc tasks for the company and department as required.

Qualifications:

1. Bachelor's degree or higher, with a major in Project Management, Mechanical Engineering, Electronics, Software, or a related field.
2. Demonstrate strong communication skills.
3. Exhibit strong logical thinking and a track record of project management experience.
4. Display the ability to handle and work well under pressure.

Job Title: Support Engineer (SNC23Q3005)

Job Type: Full time

Location: Zhejiang, China

Company Overview:

Established in 1984, Sunny Optical Technology (Group) Co., Ltd. stands as a world-leading manufacturer of integrated optical components and products. In 2007, the company achieved a significant milestone by becoming the first domestic optical enterprise to be listed on the main board of the Hong Kong Stock Exchange. We are actively searching for a highly skilled and motivated Business Development Manager to become a valuable member of our team and contribute to our unwavering commitment to excellence and innovation in the field of technology.

Responsibilities:

1. Manage international key clients, oversee business coordination, and provide comprehensive business management.
2. Drive business promotion during the initial phases of internal new projects.
3. Take charge of project promotion and ensure its timely completion while maintaining quality and quantity standards.

Qualifications:

1. Bachelor's degree.
2. Recent graduates majoring in optics are preferred.
3. Demonstrate strong logical and communication skills.
4. Proficiency in using Excel and PowerPoint is required.

Job Title: Failure Analysis Engineer (SNC23Q3007)

Job Type: Full time

Location: Zhejiang, China

Company Overview:

Established in 1984, Sunny Optical Technology (Group) Co., Ltd. stands as a world-leading manufacturer of integrated optical components and products. In 2007, the company achieved a significant milestone by becoming the first domestic optical enterprise to be listed on the main board of the Hong Kong Stock Exchange. Over the past 30 years, the company has experienced remarkable growth, expanding more than 10 times every decade. Now, Sunny has established stable, close, and long-term strategic partnerships with globally renowned customers in related industries. Notably, the company holds the top global market share in automotive lenses, camera modules, and mobile phone camera lenses.

We are actively searching for a highly skilled and motivated Failure Analysis Engineer to become a valuable member of our team and contribute to our unwavering commitment to excellence and innovation in the field of technology.

Responsibilities:

1. Accountable for enhancing the reliability, process efficiency, and analysis of abnormalities in the camera module.
2. Spearhead the analysis of intricate issues and establish a robust failure analysis system for challenging problems.
3. Engage in research on advanced failure analysis technologies to elevate our capabilities in this domain.

Qualifications:

1. Master's degree or higher in a science or engineering field.
2. Proficiency in utilizing tools such as Matlab, Excel, and Minitab.
3. Possess strong logical reasoning, a strong sense of work responsibility, teamwork skills, an innovative spirit, and the ability to thrive under pressure.

Job Title: Product Validation Engineer (SNC23Q3008)

Job Type: Full time

Location: Zhejiang, China

Company Overview:

Established in 1984, Sunny Optical Technology (Group) Co., Ltd. stands as a world-leading manufacturer of integrated optical components and products. In 2007, the company achieved a significant milestone by becoming the first domestic optical enterprise to be listed on the main board of the Hong Kong Stock Exchange.
